

Wreck Check - Auto Accident Checklist

At Saylor Insurance, we know accidents happen. While we hope that you never have to experience an accident, we also know that at some point, many people will.

When an accident happens, many people may become so upset that they forget to gather important information. To help you know what you are to do and what information to get, we have included a link to this very important auto accident checklist called "Wreck Check", provided by the National Association of Insurance Commissioners (NAIC)...

http://www.insureuonline.org/auto_accident_checklist.pdf

This checklist will not only help you to gather important information that can be useful in filing the police report, but also in filing an accident report with your insurance company as well. This is also an ideal checklist to go over with any newly licensed (youthful) drivers in your family before they get behind the wheel by themselves.

We suggest that you print this checklist out and keep one in every vehicle along with your proof of insurance (ID) card. And always remember to call the police for any accident.

**** Please note that the file size is 4 MB, so it may take just a little time to download – depending upon your internet connection.**
